DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/9/04 has been entered.

Reissue Applications

2. Claims 8, 26, 35, 43, and 60-70 have been previously canceled in the pre-amendment. Pending claims are 1-7, 9-25, 27-34, 36-42, and 44-59.

Remark

3. All of the objections raised from the examiner have been complied and corrected by the applicants in the substitute amendment filed December 27, 2005.

Allowable Subject Matter

4. Claims 1-7, 9-25, 27-34, 36-42, and 44-59 have been allowed.

5. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest a chassis frame and module combination comprising:

a) a plurality of modules including:

1) an amplifier module having:

a housing of electrically conductive material defining an enclosed interior; said housing having a front face and an opposite rear face separated by opposite side walls and opposite end walls,

Art Unit: 2618

with each of said faces and sidewalls being of predetermined dimension and with said sidewalls being parallel to one another; each of said end walls having a projecting flange extending in a common plane generally parallel to said sidewalls and with said common plane offset from a central longitudinal axis of said housing; said front face including end portions exceeding beyond each of said end walls;

two coax connectors secured to said rear face with an outer shield of said coax connectors electrically coupled to said housing;

a circuit board contained within said interior and positioned generally parallel to and spaced between said sidewalls; said circuit board having a component side opposing a first of said sidewalls and a ground side opposing a second of said sidewalls, said ground side including a layer of electrically conductive material electrically connected to said housing;

a plurality of connection locations on said circuit board, each of said connection locations including a ground connections for connecting ground shields of coax cables to said layer of electrically conductive material; said component side of said circuit board including a circuit component interconnected with said connection locations through a circuit path;

said circuit component including an amplifier circuit selected to amplify a RF signal supplied to one of said coax connectors and to provide an amplified RF signal to the other of said coax connectors; said coax connectors connected to said connection locations, each of said outer shields of said coax connectors connected to said ground connections of said connection locations; a power supply port located on said rear face; said power supply port interconnected to said amplifier circuit through a circuit path of said circuit board;

Art Unit: 2618

- 2) a transformer module having a transformer electrically coupled to said power supply port of said amplifier module for powering said amplifier circuit, the transformer having a housing with a front face, a rear face, opposite sidewalls and end walls, each of the end walls having a projecting flange;
- b) a chassis frame including a pair of spaced apart walls, said wall spaced apart by a distance substantially equal to a distance between said end walls of said amplifier and transformer modules; each of said walls including a groove, each groove sized to slidably receive one of said projecting flanges as cited;
- c) a lock member for locking at least one of said end portions on each of said plurality of modules to said chassis frame as claimed in claim 1 and with similar limitations in claims 10, 28, and 45.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
